

Security & Compliance

At RevHC, security, privacy, and responsible use of healthcare data are foundational to our operations.

Healthcare Data Protection

Our processes and platforms are designed to support the protection of healthcare and patient-related information in alignment with applicable healthcare data protection standards and privacy expectations.

Information Security

We maintain administrative, technical, and organizational safeguards to protect data against unauthorized access, disclosure, alteration, or misuse. Security controls are continuously reviewed and strengthened to support secure operations.

Responsible AI

Our AI-driven solutions follow a governed, human-in-the-loop approach with validation, oversight, and transparency to ensure safe, ethical, and accountable deployment within healthcare environments.

Compliance Mindset

RevHC operates with a structured compliance approach, focusing on data protection, operational discipline, and responsible technology practices appropriate for healthcare and enterprise environments.
